

# Uppara Karthik Kumar

## Backend Engineer

 Bengaluru , India  +91-7416179170  karthikkumar732@gmail.com  linkedin.com/in/karthik-kumar-uppara

## PROFESSIONAL SUMMARY

Karthik has 8+ years of industry experience in solution design, impact analysis, feasibility assessment, and enterprise application development, with Agent AI, Intelligent Automation and data-driven platforms. He has hands-on experience designing and developing AI-enabled orchestration frameworks, and LLM observability capabilities for tracking usage, evaluation, and drift across agents and conversations. He also brings strong expertise in microservices architecture using Spring Boot, CI/CD pipeline development, and enterprise integration solutions using Mule ESB and Workato

## TECHNICAL SKILLS

|                                     |                                                                                                                                                                               |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Backend Engineering</b>          | Java (8+), Python, Spring Boot, Spring Cloud, Microservices, RESTful API Design, JPA/Hibernate, Kafka, JMS, Asynchronous Processing, API Gateway patterns                     |
| <b>Agentic AI</b>                   | Ai Orchestration, Snowflake data agents, LLM Observability, RAGAS, Conversation AI, LangChain, MCP, Snowflake Cortex                                                          |
| <b>Automation &amp; Integration</b> | Workato (Automation Pro 1–3), MuleSoft (MCD-Level 1), Camunda BPM, Apache Camel, RPA, Playwright, Salesforce, NetSuite, Workday, Jira integrations, ETL & workflow automation |
| <b>Cloud &amp; DevOps</b>           | AWS (Lambda, S3, SNS/SQS, CloudWatch), GCP (GKE, Pub/Sub, Cloud SQL), Docker, Kubernetes, Helm Charts, Jenkins, Bitbucket Pipelines, CI/CD, Splunk Observability              |
| <b>Databases &amp; Storage</b>      | MySQL, PostgreSQL, MongoDB, Elasticsearch – schema design, query optimisation, data migration                                                                                 |
| <b>Frontend (Supporting Skills)</b> | React, JavaScript, Angular, HTML/CSS – supporting UI components and dashboards                                                                                                |

## CERTIFICATIONS

- MuleSoft Certified Developer – Level 1 (Mule 4)
- AWS Certified Cloud Practitioner
- AWS Certified Solutions Architect – Associate
- Automation Pro 1, 2 & 3 – Workato
- Automation Centre of Excellence

## PROFESSIONAL EXPERIENCE

**Enquero – A Genpact Company | California, USA** *Dec 2025 – Present*

**Client:** Cisco

**Description:** Commerce Automation AI Marketplace

**Tech Stack:** Python, React, Playwright, Temporal, Langchain, LLM, Snowflake

- Led the enablement of a federated IAP (Intelligent Automation Platform) delivery model, empowering cross-functional teams to build their own automations while ensuring central governance.
- Built an intelligent orchestration framework for scheduled case ingestion, queue monitoring, and rules-based case routing.
- Implemented Temporal workflows for multi-step activity orchestration and reliable downstream processing. Automated result persistence and queue dispatch using configurable business rules.
- Developed an observability module to track LLM usage, RAGAS metrics, and drift at agent and conversation level.
- Enabled cost visibility across agents to identify high-consumption areas and optimize platform usage.
- Improved governance through detailed agent-wise monitoring and usage analytics

- Built a role and team based snowflake agent for secure natural language access to enterprise datasets.
- Implemented permission-aware SQL generation based on user table access and metadata rules.
- Integrated the agent with CIRCUIT to provide conversational access to Snowflake-backed information.

#### **Enquero – A Genpact Company | California, USA** *Apr 2024 – Nov 2025*

**Client:** Atlassian

**Description:** Intelligent Automation Platform Build & Support

**Tech Stack:** Jira, Spring Boot, SQL, React, Redux, jQuery, Workato, MuleSoft, UiPath, Camunda

- Led the enablement of a federated IAP (Intelligent Automation Platform) delivery model, empowering cross-functional teams to build their own automations while ensuring central governance.
- Established platform-wide best practices, reusable frameworks, and design standards across Workato, Camunda, and UiPath.
- Designed and developed custom connectors and accelerators to extend platform capabilities and Atlassian-specific internal services.
- Administered and configured IAP tools including creation of roles, workspaces, environment setup, and lifecycle automation workflows.
- Migrated UiPath to an RPA framework (Playwright), significantly reducing license costs, and set up the Orchestrator for the same.
- Performed peer code reviews and led design discussions for platform enhancements.
- Developed an Agentic AI-powered MCP Server using Rovo and Forge App.

#### **Enquero – A Genpact Company | Bangalore, India** *Aug 2022 – Mar 2024*

**Client:** Atlassian

**Description:** Customer Support Application Development & Integration with External Systems

**Tech Stack:** Jira, Spring Boot, React, JavaScript, Workato, AWS

- Designed and developed UI components and web pages for the Support Form App (SAC) using React and JavaScript, with test coverage using Cypress.
- Created and updated Workato automation recipes integrating with Salesforce, NetSuite, and other external APIs.
- Developed and maintained REST APIs for the Customer Support Service, processing data via Camunda workflows and creating support tickets in Jira.
- Added custom fields in Jira management and built automation flows using A4J and Workato recipes to populate those fields.
- Performed peer code reviews and contributed to design discussions for enhancements.

#### **Enquero Global LLP | Bangalore, India** *Jun 2021 – Aug 2022*

**Client:** Symphony Communications

**Description:** GCP Migration & Directory Service Modernisation

**Tech Stack:** Spring Boot, MySQL, Java 1.8, GCP, AWS, Elasticsearch, Kubernetes

- Led development of a Directory Service providing fast, relevance-ranked user search ordered by interaction frequency.
- Developed CI/CD pipelines to build and publish Docker images to the container registry.
- Migrated application components, MySQL datasets, and Elasticsearch indices from AWS to GCP with zero downtime.
- Built Helm charts and deployed the service on GKE, improving reliability and scalability.
- Led a team of 4 engineers, providing technical direction, code reviews, and delivery oversight.

#### **Enquero Global LLP | Bangalore, India** *Sep 2020 – Jun 2021*

**Client:** New Relic

**Description:** ETL solution for consolidating data from SaaS applications into the Anaplan Data Hub

**Tech Stack:** MuleSoft 4, Java, Anaplan

- Sole Integration Engineer responsible for designing and developing end-to-end data integrations across Salesforce, NetSuite, and Anaplan.
- Built MuleSoft flows to extract, transform, and load operational data into the Anaplan Data Hub with consistency, validation, and fault-tolerance.

- Designed System APIs for Anaplan, enabling reusable, scalable API-driven integrations across multiple business domains.
- Implemented an ad-hoc and on-demand integration trigger mechanism, allowing business users to run data syncs directly from Anaplan — eliminating full-day scheduled batch delays.
- Improved data freshness and reduced processing delays by enabling real-time and near-real-time sync, significantly accelerating planning and reporting.

#### **Enquero Global LLP | Bangalore, India** *Apr 2020 – Sep 2020*

**Description:** Worked on Internal Product Online Exam Application for Campus Hiring Events

**Tech Stack:** Spring Boot, MySQL, Java 1.8, React

- Spearheaded the architectural design and structural planning of primary application modules.
- Built scalable microservices using Spring Boot and JPA.
- Integrated ActiveMQ for asynchronous email messaging.
- Managed Docker-based deployment and service maintenance.
- Led a team of 3 developers to deliver high-quality backend APIs.

#### **Enquero Global LLP | Bangalore, India** *Jan 2020 – Mar 2020*

**Client:** Cisco

**Description:** Sales Incentive Solution for Partners Management

**Tech Stack:** Spring Boot, Angular 7, Java 1.8, Oracle

- Developed microservices and JUnit test cases for the application.
- Developed DAOs for retrieving data from the database, invoking PL/SQL procedures and SQL queries for performance improvement.

#### **Enquero Global LLP | Bangalore, Karnataka, India** *Jun 2018 – Dec 2019*

**Description:** Worked on Internal Product PULSE - Employee Allocation Management Solution for Projects

**Tech Stack:** Spring Boot, Angular 7, MySQL, Java 1.8, Swagger

- Developed RESTful services using Spring Boot with comprehensive JUnit test cases for code quality and reliability.
- Contributed to database schema design, ensuring scalable and efficient data models.
- Implemented Apache ActiveMQ for asynchronous email notifications.
- Built CI/CD pipelines in Bitbucket, enabling automated deployment across multiple environments.
- Developed the security layer including SSO login integration, authentication, and authorisation.
- Designed and implemented an integration solution to sync data from NetSuite to Pulse using the Factory Pattern for clean, extensible architecture.
- Provided ongoing support for performance optimisation, debugging, and maintenance.

## **EDUCATION**

---

### **M.S. in Software Engineering** *May 2013 – May 2018*

VIT University, Vellore

CGPA: 8.3 / 10

### **PUC – Mathematics, Physics & Chemistry (MPC)** *Apr 2011 – Apr 2013*

NRI Junior College, Guntur

Score: 93%
